INTERNAL AWARDS PROGRAMS
OVERVIEW
RESEARCH COUNCIL MEMBERS
2008-2009 AWARDS TABLE
FIVE-YEAR SUMMARY
DETAILED FUNDING

INTERNAL AWARDS PROGRAM – FY 2008-2009

Established in 1980, the Internal Awards Program has historically been funded from indirect cost revenues generated by externally funded grants and made available by the Vice President for Research & Innovation. The Vice President calls upon the USF Faculty Senate Research Council for advice in establishing policies and procedures, and for selecting grant recipients. The Program is administered through the Division of Sponsored Research (DSR).

In the 2008-2009 academic year, grants were distributed only in the Spring cycle. As a cost saving measure this year, the Faculty International Travel Grants and the Conference Support Grants were not offered. However, the New Researcher, Established Researcher, Creative Scholarship, and Interdisciplinary Research Development Grants were funded.

The Research Council uses an NSF-type peer review process to evaluate and select awardees. During the Spring 2009 grant cycle a total of 60 faculty across all campuses served as proposal panelists and/or reviewers for the 85 applications received for consideration.

OVERVIEW 2008-2009

USF tenured/tenure-earning faculty and non-tenure track faculty whose position descriptions include responsibility for conducting independent research were eligible to apply (subject to certain restrictions) for the four Internal Award grant programs offered. A total of 85 applications were received for these grants and 27 proposals were funded (at least partially) for an overall success rate of 32%.

CREATIVE SCHOLARSHIP GRANTS (CSG)

The Creative Scholarship Grants offer up to \$7,500 for faculty working in the Fine Arts and Humanities, disciplines where significant external funding is scarce.

The Humanities include: “language, both modern and classical; linguistics; literature; history; jurisprudence; philosophy; archaeology; comparative religion; ethics; the history, criticism, and theory of the arts; those aspects of social sciences which have humanistic content and employ humanistic methods; and the study and application of the humanities to the human environment with particular attention to reflecting our diverse heritage, traditions, and history and to the relevance of the humanities to the current conditions of national life.” – *National Endowment for the Humanities*

The Arts include: “dance, design, folk & traditional arts, literature, media arts (film, television, radio, audio art), music, musical theater, opera, theater, visual art (including painting, photography, sculpture, crafts, works on paper, other genres) and multidisciplinary works.” – *National Endowment for the Arts*

Applicants are required to describe how they will publish/disseminate the results of their projects, identify potential funding sources, and outline plans for applying the results of the projects to an external grant proposal.

Twelve applications were received in the Spring semester for Creative Scholarship Grants. **Five were funded for a total of \$20,580** - an average of \$4,116 and a success rate of 42%.

ESTABLISHED RESEARCHER GRANTS (ERG)

The Established Researcher Grants are available for associate-level faculty (or higher) or assistant-level faculty who have been employed in research at USF for more than three years. The grants provide up to \$5,000 for one year of direct project support to launch productive new programs of research, scholarship, performance or exhibition that will lead to external funding for their work. In addition, the applicants are required to describe how they will publish or disseminate the results of their projects, identify potential funding sources, and outline plans for applying the results of the projects to an external grant proposal.

Seventeen proposals were received in the Spring semester for Established Researcher Grants. **Five were funded for a total of \$23,504** - an average grant of \$4,701 and a success rate of 29%.

INTERDISCIPLINARY RESEARCH DEVELOPMENT GRANTS (IRDG)

The Interdisciplinary Research Development Grant aims to stimulate research collaboration and the exploration of innovative ideas among faculty from different departments within a single USF college or across USF colleges/schools. Also eligible are USF faculty collaborating with faculty in different disciplines at other universities or agencies. The program’s goal is to lay the foundation for large-scale external grant applications, e.g., large multi-study grants, such as center grants, program project grants and training grants. It can fund pilot, draft or preliminary studies or projects. Consequently, a proposal plan is required with the application.

The IRDG program typically funds one, two-year grant. Twenty applications were received and **two new grants were awarded** this cycle with **\$50,000** being disbursed in the first year. The second year of the Spring 2008 IRDG was also renewed this year for an additional allocation of \$19,822.

NEW RESEARCHER GRANTS (NRG)

The New Researcher Grant program is for Assistant Professors (or the equivalent rank) who are new to USF (fewer than three years) and do not have established funding sources for their programs of research, scholarship, exhibition or performance. The goal of the grant is to fund activities that will provide the experience, data, or works necessary to successfully compete for grants from external agencies or foundations. The maximum amount of the award is \$10,000 for a one-year grant period. Applicants are required to describe how they will publish/disseminate the results of their projects, identify potential funding sources, and outline plans for applying the results of the projects to external grant proposals.

Thirty-six applications were received in the Spring semester. **Fourteen were funded for a total of \$91,234**, an average of \$6,517 and a success rate of 39%.
